CLMP Standard - 10 clarity readings each year

MPCA Standard (for impairment determination) 8 triplet samples (secchi, TP, Chl-a) in 10 years

COLA Recommendations: weekly secchi (CLMP) plus obtain sufficient paired chlorophyll (Chl-a) and phosphorus (TP) samples to ascertain t their lake(s); for most lakes this requires 5 samples each season for three years. The process should be repeated if there is a significant change in tra
